## Overview of latest updates of the platform B R 0 Help for this page ProductIPedia

Flow of creating a Technical file:

### Step:

- Create a TCF 1.
- Upload the documents you have 2.
- Ask your supplier for more documents 3.
- Review and link the documents 4.
- 5. Create a CE declaration (if applicable)

PRODUC

2

### 03.08.21

## THE PLATFORM IN A NUTSHELL:

## Create:

The platform supports you with the creation of a technical dossier containing all information about the compliance of your product.

The file contains the requirements your product has to comply with.

## <u>Manage:</u>

Invitations to upload documents are sent from the platform.

MatchIt is our unique solution for cleverly linking documents to requirements.

This creates an overview of the substantiation. All activities are recorded in the Timeline.

## Share:

You decide which documents in the technical file are shared with whom.

## Structure:

Using the platform creates structure. You always have all the information clearly and logically arranged, directly available.

## <u>Insight:</u>

You have access to the completeness of the documents per risk category.

## **STEP 1 – BUY CREDITS**

Within the ProductIP platform you pay for creating a technical file or additional services with credits.\*

You need at least 2 credits\*\* in order to be able to create a technical file. A file can cover a range of similar articles from one supplier.

Additional services such as File Assembly Support Team, Review, Organise, can also be purchased with credits.

Our pay-as-you-go model allows you to buy credits the moment you need them. You order credits online and these are instantly added to your account. The invoice will be e-mailed to you as PDF for proceeding via your finance department.

\* Enterprise accounts pay per monthly invoice.\*\* The actual number may change over time.

### First time user:

## LOG IN:

Existing users can directly login in using their e-mail address as username together with the password you have created before.

Forgot your password?

Click on the button.

You will receive an e-mail with a link to a webpage.

Here you can set a new password.

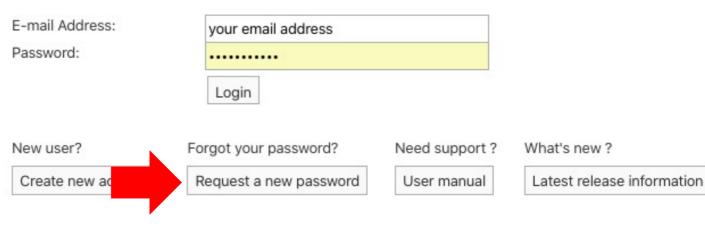

If you don't receive the email within 5 minutes, please check your SPAM folder.

Welcome to ProductIP, the internet based expert system for creating, managing and sharing CE Technical Compliance files.

ProductIP is not a sourcing site. You can only see the technical files that you have created or that you have given access rights to from others. Users are identified via a combination of a user name, your e-mail address, and a password. If you are a new user we ask you to register first so we can verify you have access to the e-mail address you want to use for our system. Please contact us in case you need assistance: helpdesk@productip.com.

## GO THROUGH THE Q & A:

In order to generate the correct requirement list that is the basis for your technical file, the Platform will ask you several extra questions.

This requires some knowledge of the product. A wrong answer can add or omit a requirement from the list.

• In what countries will you sell?

=> Do not choose all countries, if you only sell it in Germany and France, it can make your list longer with requirements which are not applicable for you.

• Product specific questions

=> So we can add all applicable requirements to your list

Other questions:

- Does the product have packaging
- Do you want to keep track of inspection requirements / results in this the file?
- Do you want to keep track of social compliance aspects of your supply chain partners via this file?

You will find more explanations why this questions is ask, and sometimes more information in a Compliance clip. This is a short "wikipedia like" explanation, about this particulair topic.

New Technical File Wizard(4/8)	
<b>Do you want to add requirements for the packaging to the file?</b> If the product contains packaging then the packaging and packaging waste (P packaging and all packaging waste whether it is used or released at industrial, any other level, regardless of the material used. The PPWD relates to sales part (secondary) and transport packaging (tertiary). Click here for more information	, commercial, office, shop, service, household or
<ul> <li>YES; include packaging in the requirement list.</li> <li>NO; the product has no packaging.</li> <li>NO; the packaging is integral part of the product throughout its lifetime.</li> <li>NO; the requirements for the packaging are dealt with separately.</li> </ul>

## FIND THE PRODUCT CATEGORIES:

New Technical File Wizard(3/8)	×
Search and select your product Use keywords in English to search for your product in our database. If you type more than one keyword, the results are shown for the combination of these keywords. If there are no results for the combination, more results are shown for each keyword separately.	ĩ
Please note: charges apply if you add additional product categories after creating the file.	
Selected product categories None	
Possible matches       Display 10 € records per page       Name	
click here to upload a product photo to Google Vision to match automatically with our database [BETA]	
First Previous Next Las	st
<< Back Next >>	_

What if my product is not in the database?

You can then temporarily choose "PROVISIONAL".

After creating the file, add documents for additional information so that we can choose the right category.

ProductIP receives a notification, and we will add the appropriate category. (3-5 work days) After this you will receive an email and you can get started.

Find PROVISIONAL

## HOW DO YOU WANT TO CREATE THE FILE?:

There are several ways to create a file.

If you have little experience, we recommend starting the first file in Fast. <u>Here</u> you will find more information and explanations about the different options. If you have or can collect the necessary documents but lack the expertise to review and link them correctly, then choose DIY, add the documents and then upgrade the file to organize and we will start working for you.

this button allows you to upgrade the file to a different service

### New Technical File Wizard(8/8)

### Investment in the technical file: 2 credits

Please select the service level that you need. (this can be upgraded at a later stage as well):

### ○ Do It Yourself (DIY) (no extra charge)

You can co-operate with your supplier via INVITE. You will review the documents yourself.

### ○ Supplier Connect (CONNECT) (+4 credits)

We will contact your supplier and explain to them the basics on how to make a technical file. You need to initiate the invite yourself via the Invite TAB in the file. You will review the documents uploaded by the supplier yourself. Our services stop when the supplier starts to upload the documents.

### • File Assembly Support Team (FAST) (+14 credits)

We will act as your compliance expert secretariat.

Contact your supplier via invite. Explain purpose and use of technical files. Chase them for compliance evidence, add metadata, check the authenticity (for "A" category requirements evidence only) and sign off requirements where possible. There are two rounds of collecting, evaluating, linking and reporting included in this service.

Support in using the ProductIP platform is always included in the 1st credit. Contact us if you want to learn more about DIY, CONNECT and FAST. Please note that you can always upgrade the service level per individual file at a later stage

### O Supplier Connect (4 credits )

We will contact your supplier and explain to them the basics on how to make a technical file. You need to initiate the invite yourself via the Invite TAB in the file. You will review the documents uploaded by the supplier yourself. Our services stop when the supplier starts to upload the documents.

### ○ File Assembly Support Team - FAST service (14 credits)

We will act as your compliance expert secretariat.

Contact your supplier via invite. Explain purpose and use of technical files. Chase them for compliance evidence, add metadata, check the authenticity (for "A" category requirements evidence only) and sign off requirements where possible. There are two rounds of collecting, evaluating, linking and reporting included in this service.

### O File review (8 credits)

We will check the completeness and relevancy of the compliance evidence in the file and report what we feel is missing or incorrectly used. We will not amend anything in the file nor check the authenticity of the documents. There are two rounds of reviewing and reporting included in this service.

### $\bigcirc$ File organize (10 credits)

We will organize your file by reviewing each document, complete the metadata, check the authenticity (for "A" category requirements evidence only) and sign off requirements where possible. There are two rounds of organizing and reporting included in this service.

**PRODUC** 

## WHAT TO DO NEXT:

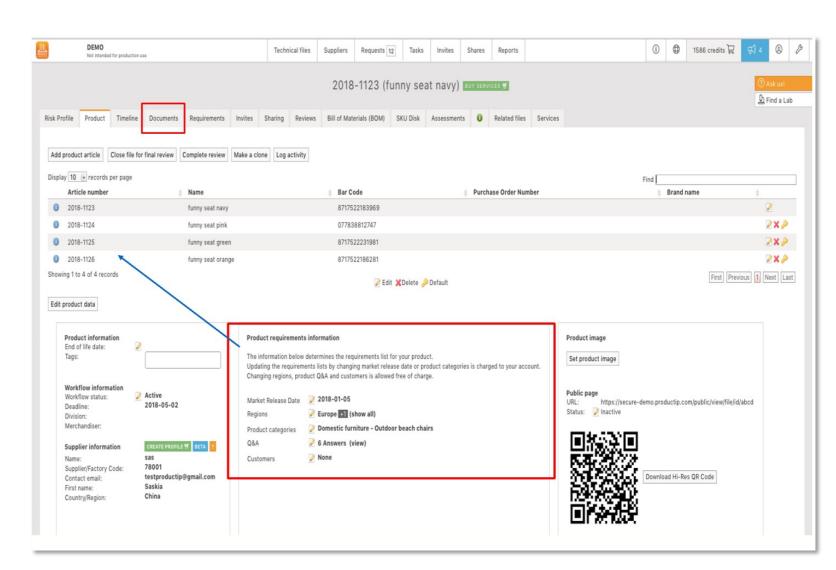

Now you can add the other articles to the file. These will be displayed on the Product tab.

Risk Profile	Product	Timeline
_		

On the Documents tab, you collect the documents that are relevant to the articles listed on the Product tab.

On the Requirements tab, you find the requirements that apply to the articles.

The requirements list is based on the information indicated in the red frame.

## COMPLIANCE CLIP

**REQUIREMENT CATEGORIES** 

Category C

The combination of requirement categories A

and B creates the minimum for a technical file as

expected by the market surveillance authorities.

So here you have your first focus: A + B1 + B2.

**Performance and specification** These are requirements that are used to prove

performance or functional aspect of a product.

organisations the marketing and communication

department. Examples are colour fastness of

Non-compliance may lead to complaints and

The owner of such claims is in most

textiles and durability of products.

dissatisfied users of the products.

**Corporate responsibilities** 

This category covers all kind of requirements

owner of these requirements is the board of

and waste recycling requirements.

agenda's related to these topics.

Category E

market.

related to Corporate (Social) Responsibility. The

directors of the company. Examples are BSCI, FSC

Non-compliance may lead to critical questions

from consumers and especially NGO's have

**Business critical requirements** 

Non-compliance with these requirements means

that the risk of not being able to sell this product

is very high, not from a legal but from a business point of view. For example licenses or default

sizes of kitchen furniture or other aspects of

products have become "the standard" in the

Category D

## Make your life easier and the structure of your files more clearly with the requirement categories in ProductIP.

When you first start to make technical files the list of requirements can be overwhelming. We have added categories that help you breakdown the requirement list in different risk levels. This means you know where to start first and focus.

### Category A Type testing

Standards and requirements that are related to the intrinsic design of the product. In most retail organisations it is the responsibility of the purchasing department to ensure that this information, together with specifications and so on, have been made available to the supplier. The supplier in return has to provide the evidence: a test report, declaration or similar. The majority of the requirements is in this category, it includes the harmonised standards that typically are applied to show compliance with the essential requirements of directives, such as: Toys, LVD, EMC, R&TTE, PPE and more.

### Category B

Production Where category A requirements relate to the construction and design, B requirements relate to the actual production of the product. Has the product been made as it was originally tested? It is important to check if materials that are used during manufacturing of the product are not in conflict with legislation (REACh, RoHS, Food Contact Materials, etc.).

We differentiated the category B in three subcategories (B1, B2 and B3) dependent on the penalties that market surveillance authorities may proclaim.

 ProductIP B.V. Office Address: Copernicuslaan 30 | 6716 BM EDE | The Netherlands

 Rabobank 1507.70.359 | Chamber of Commerce 09188071

 T +31 318 700 622 | expert@productip.com | www.productip.com

### Category F

### Company specific requirements

This includes requirements defined by buying companies in addition to the legal requirements. Non-compliance may lead to a situation where your customer is not accepting the goods. (Note that it is also possible for you to distribute in an orderly manner your set of requirements to the market via ProductIP).

### Category G

### **Guides and Test methods**

Requirements that contain guidelines on design (e.g. products with hot surfaces or hygiene for food processors) or describe test methods (e.g. standby current for appliances or chromium content in leathers). These requirements do not contain limits, but they could be referred to in test reports.

### Category T Transport

Requirements that are applicable to the transport of products, such as fumigation of wood, or the safety tests for transport of lithium batteries are shown here.

### Category DOC

Declaration of Conformity An overview of the CE marking directives that are applicable for the product that must be mentioned on the Declaration of Conformity are listed here. ш z СA CTS Δ 0 Ř ۵. Т HIC ≥ Z Ω RL 0

## **STEP 3 - UPLOAD DOCUMENTS:**

Within the file you need to start collecting documents that allow you to demonstrate that the product complies.

Upload the documents that you already have to match the different requirements on the list.

Risk Profile       Product       Timeline       Documents       Requirements       Invites       Sharing       Reviews         Image: Comparison of the product of the prod
Display 100 records per page
Chausing 0 to 0 of 0 vecesula
Showing 0 to 0 of 0 records

## **HIDE INFORMATION:**

## **Redaction tool**

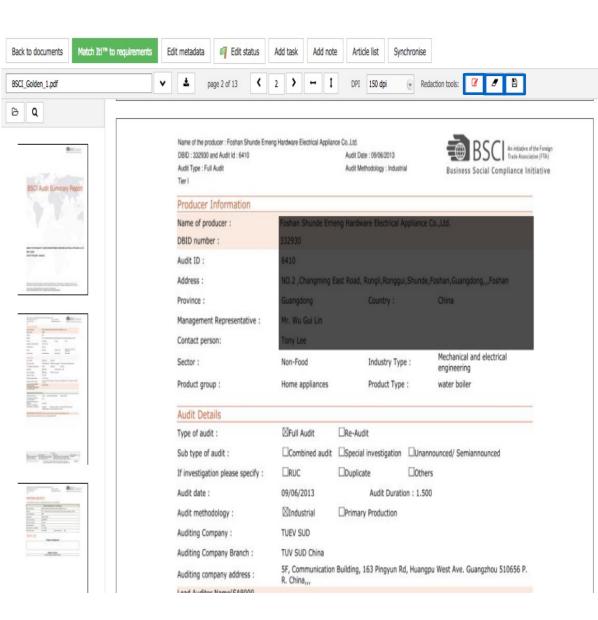

Sharing a technical file with your business partner is a common thing. They may need it because they are the brand owner and have the responsibility for compliance. They may also want to see it as part of a review of your efforts as an importer.

Sharing a technical file through ProductIP keeps the information in context and makes the review more efficient. You make available the scope of the dossier, the correct market introduction date, the countries selected, and all of this adds to the confidence they have in your concern for product and social compliance.

We automatically hide information about your supplier when you share a file, but this cannot be done automatically for what is in your documents! We now have a solution for that!

With the editorial tool in the viewer, you can remove such information and create a document that you can share. We immediately add a watermark to that document so that the recipient knows that you have the document that is the basis for this edited document available in case it is needed

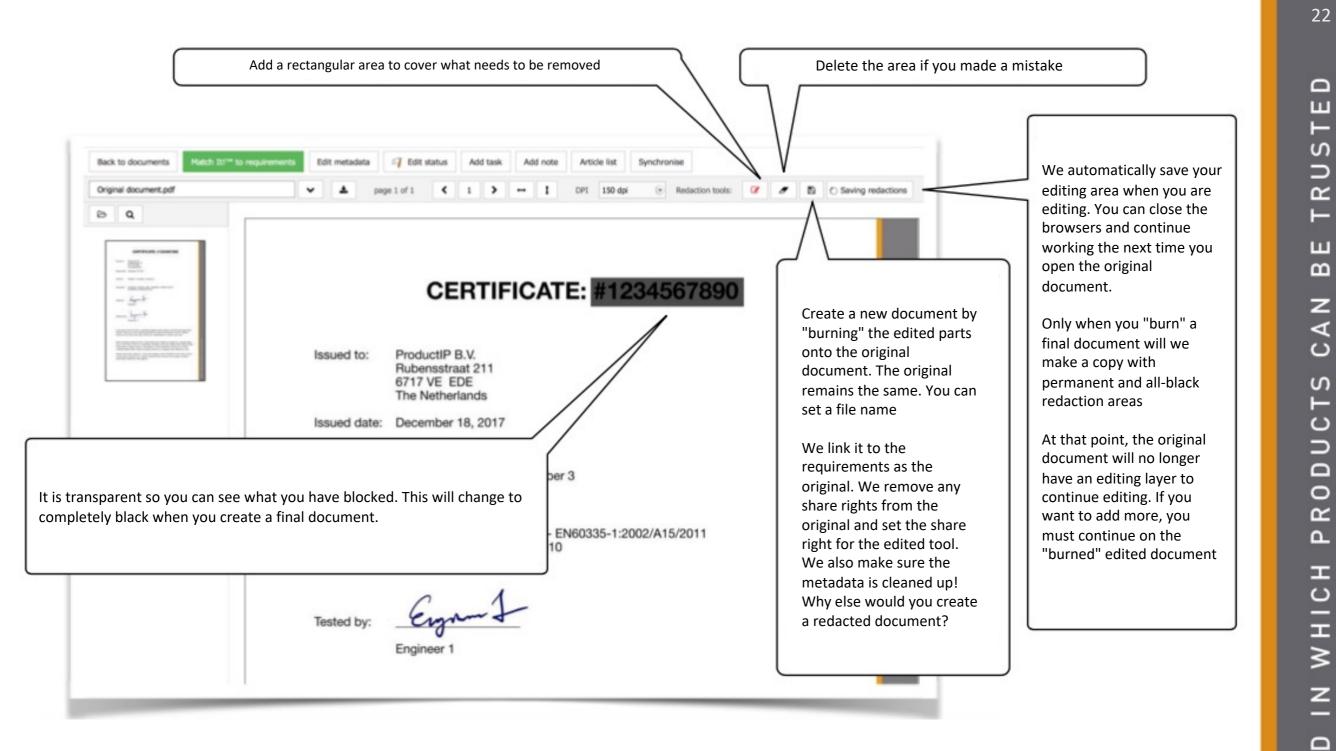

How does this work?

Save a copy of this document (Redactions will be burned)

PRODUCT

## **REVIEW THE DOCUMENTS:**

Review the received documents

At the moment you receive documents (test reports), the specified standards are the tools to check if you have received the correct evidence.

You need to read and check the test report:

Is this about my product (check the picture)?

Who performed the test

When was the test performed

What is the result

When the documents meet the necessary requirements, Match-it can be used to link the document to the requirements, so that you have an overview of whether you have the complete documentation. In case of a transition period, you can either tick off the requirements or declare them not applicable.

Check also our other events: https://www.productip.com/event-calendar/calendar-view 24

TED

## LINK DOCUMENTS:

With MatchIt you can link the documents to the

Requirements.

Please note, this is a suggestion, so please tick the appropriate requirements.

You still need to read the document, and verify that the document is relevant and that the documents are compliant.

After checking the requirements, you can choose the blue button, document is relevant, but not yet sufficient.

Select the green button if the requirement is fulfilled.

## The supplier can see the status of the document:

**PRODUC1** 

## Create the CE declaration:

For articles to which the CE marking applies, it is easy to make a declaration via the system in the various languages.

You can find on the requirement list, what should be listed on the declaration.

When you have collected all evidence for those requirements you can draw up the declaration
